PART I: INTRODUCTION AND OBJECTIVES OF THE SURVEY

1.1 Introduction

The relentless exploitation of agriculture and growth of population in Ethiopia have made land an extremely expensive natural resource. This problem is even more pronounced in rural parts of the country within the private peasant holdings where the quest for agricultural land is grave. Land scarcity is in the spotlight and a persistent concern to the government at the height of the march on food security. By virtue of being an indispensable part of life, land is changing invariably in configuration resulting in minuscule holding size per household and becoming a scant supply to farmers in Ethiopia. Information on the mode of land use that prevails within the farming population certainly assists the government to spell out land use policy so as to cope with the pressure on agricultural land.

In view of this, to gauge the shifting make-up of land use and help decision makers articulate the fitting policies, the Central Statistical Agency (C.S.A) has been providing statistical information by collecting, processing and summarizing data on the country's agricultural land use by employing standard procedures of data collection. The 2020/21 (2013 E.C) Agricultural Sample Survey was conducted to furnish data on land utilization within the private peasant holdings for Meher season of the same year.

The survey results are presented in this bulletin and on electronic media for data users. This report comprises three parts. Part I contains the objectives of the annual survey. Part II deals with coverage of the survey, sample design, field organization and method of data collection and Part III includes summary of the results. Estimation procedures and formulation of estimates of totals and variance are presented in Appendix I. Estimates of the standard errors with the corresponding coefficients of variations for land use area are presented in Appendix II.

1.2 Objectives of the Survey

The general objective of CSA's Agricultural Sample Survey (AgSS) is to collect basic quantitative information on the country's agricultural land that is essential for planning, policy formulation, food security, etc. The AgSS is composed of four components: Crop Production Forecast Survey, Meher Season Survey of which land use is a part, Livestock Survey and Belg Season Survey. The specific objectives of Meher Season Survey (Land Utilization) are to estimate the total cultivated area and other forms of land use. Companion reports are also published separately with estimates of crop area, volume of production and quantity of agricultural inputs during Meher Season agriculture. The Land Utilization report is based on private peasant holdings in sedentary rural areas of the country. The data is summarized at regional and zonal levels.

PART II:

SURVEY METHODOLOGY, DATA COLLECTION AND PROCESSING

2.1. Scope and Coverage of the Survey

The range of data items that the 2020/21 (2013 E.C.) Annual Agricultural Sample Survey (Meher Season) dealt with includes all cereals, pulses and oilseeds and the most commonly grown vegetables, root crops, permanent (perennial) crops and other cash crops. Holders growing at least one or more of these and/or other crops are enumerated and data on cropland area and yield condition recorded, hence data on production of these crops acquired.

The 2020/21 (2013 E.C.) Annual Agricultural Sample Survey (Meher season) covered the entire rural parts of the country.

To be covered by the survey, a total of 2,768 Census Enumeration Areas (EAs) were selected. However, due to various reasons that are beyond control, in 397 EAs the survey could not be successful and hence interrupted. Thus, all in all the survey succeeded to cover 2,371 EAs (85.66%) throughout the regions. The Annual Agricultural Sample survey (Meher season) was conducted on the basis of 20 agricultural households selected from each EA. Regarding the ultimate sampling units, it was intended to cover a total of 55,360 agricultural households, however, 47,420 (85.66%) were actually covered by the survey.

2.2. Sampling Frame

The list containing EAs of all regions and their respective households obtained from the 4th round population and housing census cartographic frame was used as the sampling frame in order to select the primary sampling units (EAs). Consequently, all sample EAs were selected from this frame based on the design proposed for the survey. The second stage sampling units, households, were selected from a fresh list of households that were prepared for each EA at the beginning of the survey.

2.3. Sample Design

In order to select the sample, a stratified two-stage cluster sample design was implemented. Census Enumeration Areas (EAs) were taken to be the primary sampling units (PSUs) and the secondary sampling units (SSUs) were agricultural households. The sample size for the 2020/21 (2013 E.C.) agricultural sample survey was determined by taking into account both the required level of precision for the most important estimates within each domain and the

amount of resources allocated to the survey. In order to reduce non-sampling errors, manageability of the survey in terms of quality and operational control was also considered.

All administrative zones in each regional state were taken to be the domain of estimation for which major findings of the survey are reported.

2.4. Selection Scheme

Enumeration areas from each stratum were selected systematically using probability proportional to size (PPS) sampling technique; size being number of agricultural households. The sizes for EAs were obtained from the 4th round Ethiopian population and housing census cartographic frame. From the fresh list of households prepared at the beginning of the survey, 20 agricultural households within each sample EA were selected by systematic random sampling technique.

Estimation procedure of totals, ratios, sampling error and the measurement of precision of estimates, standard errors and coefficients of variation (CV) are given in Appendix-I and II respectively. Distribution of sampling units (sampled and covered EAs and households) by stratum is also presented in Appendix-III.

2.5. Organization of Field Work

The conduct of a survey cannot be executed without the arrangement of fieldwork. In recognition of this, the organization of fieldwork has been entrusted to the field operation coordination office that liaises between the Head Office and the 24 Branch Statistical Offices spread across the regions. All Branch Offices took part in the survey execution especially in recruiting the enumerators, organizing the 2nd stage training, assigning the field staff to their sites of enumeration, supervising the data collection, electronic data transfer and retrieving completed questionnaires and submitting them to the Head Office for data processing.

The Branch Offices were also responsible for administering the financial and logistic aspects of the survey within their areas of operation. A total of 2,906 enumerators, 923 field supervisors and 204 statisticians/experts were involved in the data collection where on the average one supervisor was assigned to three enumeration areas for supervision of data collection operation. All the enumerators were supplied with the necessary survey equipment (GPS-equipped tablets, solar battery chargers, kitchen balance scales, etc.) after the

completion of the training to ensure the smooth operation of the survey. To facilitate the data collection activities, a total of 180 four-wheel drive vehicles were used.

2.6. Training of Field Staff

The execution of a survey and quality of data acquired from the survey highly depend on the type of training given to the enumerators and supervisors and the consequent understanding of the tasks to be performed and the standard procedures to be followed by the enumerators and supervisors in the survey undertaking. The quality and completeness of data are ensured when the training meets its objective of producing responsible and fervent enumerators and supervisors.

In light of this point, the training was given to the field staff in two stages. The first stage training, which took place at each of the 24 branch offices for 5 days targeted staff from the Head Office, statisticians/experts and senior field supervisors from Branch Statistical Offices. The staff that took part in the first stage training was then assigned to conduct similar training for the enumerators and other field supervisors for 12 days in all the 24 Branch Statistical Offices distributed across the country.

In the training, the field staff was given detailed classroom instruction on how to collect data, method of area measurement, crop cutting exercise, interviewing procedures, quality checking methods, manipulation of GPS-equipped tablets, usage of data collection applications loaded on tablets, online data transfer, etc. The training also included field practice to reinforce the understanding of concepts, definitions and theories discussed in the classroom with regard to field measurement, crop cutting, GPS-equipped tablets uses and interviewing methods.

2.7. Method of Data Collection

The agricultural data for the year 2020/21 (2013 E.C.) was collected from the entire rural small holding households by interviewing the selected agricultural holders and physically measuring their land plots/parcels and crop cut experiments to obtain data on cropland area, yields and other items of interest.

The data obtained were recorded and transferred in various forms designed for this purpose using Computer Assisted Personal Interview (CAPI) or tablets technology data collection method. Instruments like GPS-equipped tablets, kitchen balance, scientific calculators, GPS gadgets and others were used during data collection for a timely and smooth acquisition of

accurate data. The procedures for measuring area under crop and area of non-crop fields operated by the agricultural holders were performed for the 20 selected households from each sampled E.A or sample cluster

2.8. Data Processing & Tabulation

Census and Survey Processing System (CSPro) software was used by data processing experts to design the tablet-based field data collection applications based on the questionnaires prepared for each survey module by subject matter statisticians. Validity checks such as ranges, skips and consistencies were included in the application to maintain the quality and field level consistency checking of the data. Computer Assisted Personal Interviewing (CAPI) using tablets technology was used to conduct face-to-face interview, cropland area measurement and others data collection . The collected data was then transferred to the supervisors' tablets using Bluetooth. After checking the quality of data collected by enumerator, supervisors transferred the collected data to the server located at the head office using VPN network connection. At the head office, further validity checks were done on each question and consistencies between questions. If error is observed during the validity checks, the data were sent back to the field with error reports for correction. After the corrected data was sent back to the head office, further processing was done on the completed survey data. The final stage of the data processing was to summarize the data and produce statistical tables. Estimation of the statistical tables was done using CSPro and the tabulation component of IMPS (Integrated Microcomputer Processing System) software.

2.9. Concepts and Definitions

Data items of agriculture have to be distinctly defined and identified, so that the information about the items becomes useful. The correct way of stating data items and related terms is a pre-requisite for making standards and definitions for the collection and compilation of agricultural data. The purpose of using standard concepts and definitions is not only to provide quality data but also to ensure that the right items are enumerated and measured accurately to reflect the agricultural situation.

Standard concepts and definitions used in the survey help to maintain consistent enumeration and measurement of variables of interest. To achieve this, CSA communicates concepts and definitions to the field staff through training and instruction manuals. The concepts and definitions used in the survey included the following.

Enumeration Area (E.A): a census enumeration area in the rural parts of the country is a unit of land delineated for the purpose of population census with clear identified boundary, in some case equal to a locality or a part of a locality or a combination of small localities and usually consists of 100 - 150 households.

Household: a household may be either:

- a) a one person household, that is a person who makes provisions for his own living without combining with any other person to form part of a multi-person household
or
- b) a multi-person household, that is, a group of two or more persons who live together and make common provisions for food and other essentials of living. The persons in the group may pool their incomes and have a common budget to a greater or lesser extent. They may be related or unrelated persons or a combination of both. These persons are taken as members of the household.

Agriculture: The growing of crops and/or raising of animals for own consumption and/or sale.

Agricultural Household: a household is considered an agricultural household when at least one member of the household is engaged in growing crops and/or raising livestock in private or in combination with others.

Holding: a holding is all the land and/or livestock kept, which is used wholly or partly for agricultural production and is operated as one legal entity by one person alone, or with others without regard to management, organization, size or location.

Holder: a holder is a person who exercises management control over the operation of the agricultural holding and makes the major decision regarding the utilization of the available resources. He/she has primary technical and economic responsibility for the holding. He/she may operate the holding directly as an owner or a manager. Under conditions of traditional agricultural holding the holder may be regarded as the person, who with or without the help of others, operates land and/or raises livestock in his/her own right, i.e. the person who decides on which, where, when, and how to grow crops or raise livestock or both and has the right to determine the utilization of the products.

Parcel: a parcel of holding is any piece of land entirely surrounded by land and/or water and/or road and/or forest etc., which is not part of the holding. It may consist of one or more cadastral units, plots or fields adjacent to each other.

Field: a field is defined as any plot of land which is a parcel or part of a parcel under the same crop or mixed crops or any other form of land use (private holding).

Crop: includes cereals, pulses, oilseeds, vegetables, root crops, fruits, coffee, Enset, Chat, hops, sugarcane, cotton, tobacco, etc. produced for food, making drinks, stimulation, making fabrics or clothing, etc.

Crop Production: the process of growing and harvesting of the above crops for own consumption and/or sale.

Temporary/Annual Crops: Annual/temporary crops are crops, which are grown in less than a year's time, sometimes only a few months with an objective to sow or replant again for additional production following the current harvest. Continuously grown crops planted in rotation are also considered as temporary crops since each is harvested and destroyed by ploughing in preparation for each successive crop.

Permanent (Perennial) Crops: Crops, which are grown and occupy land for a long period of time, not requiring replanting for several years after each harvest, are considered as permanent crops. All fruit trees (i.e. mangos, avocados, oranges, papayas, mandarin, bananas, etc.) and trees for stimulants/beverages (i.e. coffee, tea, hops (gesho), etc.) are considered permanent crops but meadows and pastures are excluded.

Meher (Main) Season Crop: any temporary crop harvested between the months of Meskerm (September) and Yekatit (February) is considered as meher season crop, in most cases crops those planted during the major rainy season.

Belg Season Crop: any temporary crop harvested between the months of Megabit (March) and Pagume (August) is considered to be Belg Season Crop, in most case crops those planted during the short rainy season.

Fertilizer: – refers to anything that is added to the soil and intended to increase the amount of plant nutrients available for crop growth. In this survey data is elicited on two types of

fertilizers (Natural and Chemical). The Natural fertilizer consists of the farm yard manure and wood ashes while the chemical type consists of DAP (Di- Ammonium phosphate) and UREA (Ammonium Nitrate).

Improved seed:- is crop variety, which gives a significantly higher yield, and better quality compared to locally produced variety of seeds.

Pesticides :- are chemicals that are useful for the control, mitigation or elimination of pests, which are detrimental to crops. Pesticides include insecticides and herbicides.

Irrigation: - refers to the practice where an area of land is purposely and actually provided with water, other than by rain to improve/increase production of crops. The uncontrolled flooding of land by the overflow of rivers or streams is not considered to be irrigation.

Note:-

1. Those cropland area and production designated by “*” in all tables could not be reported because of high coefficient of variation (i.e. less reliable estimates). However, they are consolidated in the total estimates.
2. In all tables “-” indicates not reported or no data.
3. If in some tables, figures do not add up to total, it is due to rounding.
4. Due to incompleteness of the year 2020/21 (2013 E.C) main season field data collection in Tigray region, the 2019/20 (2012 E.C) post-harvest estimates for the respective region are imputed as a proxy estimates for completeness of national estimates.
5. This report does not include dry season irrigation crops (especially the recent initiatives of dry season irrigated wheat), commercial farm crop production and belg (short rainy season) crop production. Separate reports will be produced for those agriculture practice category.
6. In APPENDIX III, “-” for number of covered EAs and households indicate that due to reasons that are beyond control, in all EAs in Tigray region, the survey could not be successful and hence interrupted.
7. A total of 38 EA's in West Wellega, 34 EA's in Kellem Wellega, 24 EA's in Kamashi and 27 EA's in Shaka zones were selected. However, due to security problems, only 11 EA's in West Wellega, 7 EA's in Kellem Wellega, 12 EA's in Kamashi and 9 EA in Shaka zones were covered. Due to high non-response rate estimates were done with adjustments in these zones and we advise data users to use the estimates cautiously for these areas.

PART III

SUMMARY OF SURVEY RESULTS

3.1 LAND UTILIZATION

Land used for crop lands and non crop lands. Crop land is land used for the cultivation of crops, both temporary and permanent crops. Non crop land is land used for non cultivated such as fallow land, livestock grazing land, wood land, and other land uses (house, fence, ...).

Food security embraces a wide range of crops such as cereals, pulses, oilseeds etc. The fact that most of the land within the private peasant holding is under these food crops comes as no surprise when the struggle for self-sufficiency in food is being intensified.

This is nowhere more illustrated than in the land use survey results for 2020/21 (2013 E.C). The total land area reported for the private peasant holdings was estimated at higher than 22.81 million hectares and operated by more than 19.23 million agricultural households and about 23.19 million agricultural holders. The statistical tables in this report show that most of the agricultural land holdings of small agricultural holders about 71% was under temporary crops.

About 19.52 million, and 14.59 million, agricultural households were reported growing temporary, and permanent crops, respectively, for 2020/21 (2013 E.C) production year. The numbers of households growing both crops (temporary and permanent crops) are not mutually exclusive.

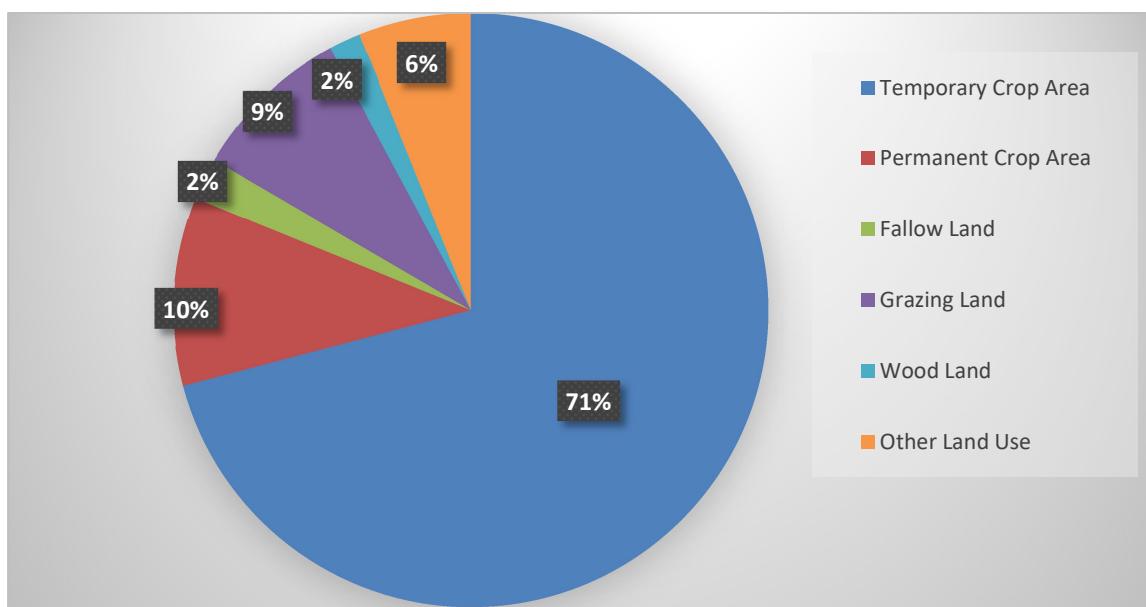

Figure 1: *Percentage distribution of all land holding by type of use, Main Season 2020/21*

The average holding sizes per household and holder were recorded to be .84 and 0.83 hectares, respectively. On the other hand the average cropland area was found out to be 0.73 hectares per household and 0.72 hectare per holder. For details refer to Statistical Table 1. Distributions of households by holding size and holders, by age, sex, holding type and cropland area, by crop type and total land area by tenure system are presented in Statistical Tables 2 up to Table 10 in the report.

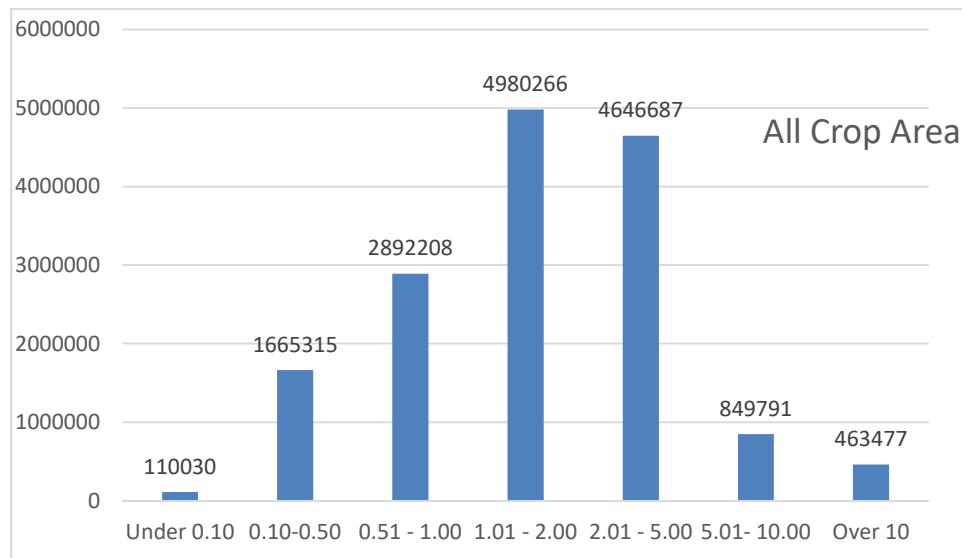

Figure 2: Distribution of all land use area (in ha) by land holding size (ha) , Main Season 2020/21

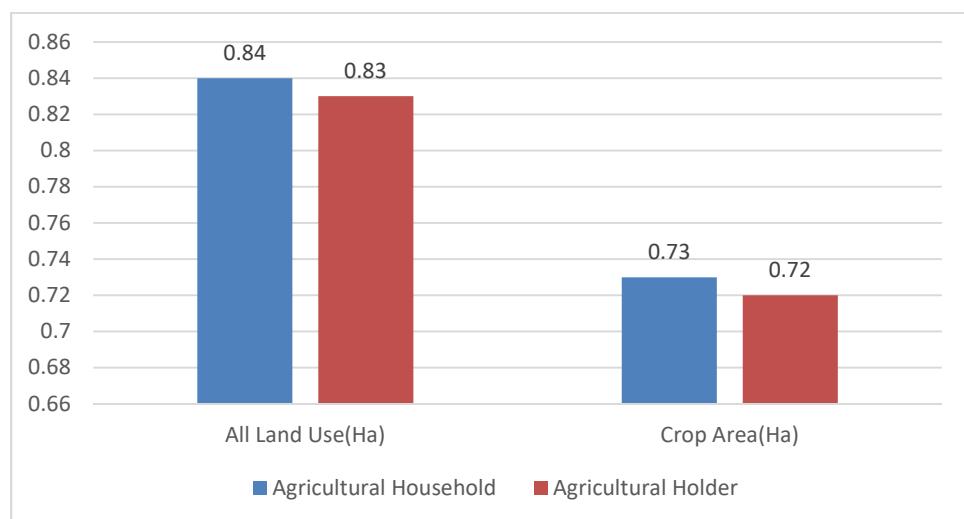

Figure 3: Distribution of Agricultural household & holders land holding size (in ha), Main Season 2020/21

APPENDIX I:
ESTIMATION PROCEDURES OF TOTALS, RATIOS AND SAMPLING ERRORS

Estimation Procedures of Totals, Ratios and Sampling Errors

The following formulas were used to estimate total area of land under specific crop, production and yield of specific crop in a stratum.

1. For Estimating Total Area Of Land Under Specific Crop:

$$\hat{A}_h = \sum_{i=1}^{n_h} W_{hi} \sum_{j=1}^{h_{hi}} a_{hij} = \sum_{i=1}^{n_h} W_{hi} a_{hi}$$

in which, $W_{hi} = \frac{M_h H_{hi}}{n_h m_{hi} h_{hi}}$ is the basic weight.

Where:

h represents the stratum

n_h is the total number of sample EAs successfully covered in the h^{th} stratum.

M_h is the measure of size of the h^{th} stratum as obtained from the sampling frame.

m_{hi} is the measure of size of the i^{th} sample EA in the h^{th} stratum obtained from the sampling frame.

H_{hi} is the total number of agricultural households of the i^{th} sample EA in the h^{th} stratum.

h_{hi} is the number of sample agricultural households successfully covered in the i^{th} sample EA in the h^{th} stratum.

a_{hij} is the value of area for agricultural household j , in the i^{th} EA in the h^{th} stratum under a specific crop.

a_{hi} is the sample total area under specific crop for EA i in stratum h

\hat{A}_h estimate of total area under specific crop in stratum h

2. For Estimating Total Number of Holders and Households:

$$\hat{Y}_h = \sum_{i=1}^{n_h} W_{hi} y_{hi}$$

Where:

y_{hi} is the sample total number of holders/households of i^{th} EA in the h^{th} stratum.

\hat{Y}_h is estimate of total number of holders/households for the h^{th} stratum.

W_{hi} is as defined above.

3. For Estimating Ratios in Stratum h :

$$\hat{R}_h = \frac{\hat{Y}_h}{\hat{X}_h},$$

Where the numerator and denominator are estimates of domain totals for characteristic y and x, respectively.

4. Sampling Variance of Estimates:

Sampling variance for the estimate of stratum total of area and ratio are estimated by the following formulas.

$$Var(\hat{A}_h) = (1 - f_h) \frac{n_h}{n_h - 1} \sum_{i=1}^{n_h} \left(\hat{A}_{hi} - \frac{\hat{A}_h}{n_h} \right)^2 + f_h \sum_{i=1}^{n_h} (1 - f_{hi}) \left(\frac{h_{hi}}{h_{hi} - 1} \right) \sum_{j=1}^{h_{hi}} \left(\hat{A}_{hij} - \frac{\hat{A}_{hi}}{h_{hi}} \right)^2$$

$$Var(\hat{R}_h) = \frac{1}{\hat{X}_h^2} [Var(\hat{Y}_h) + \hat{R}_h^2 Var(\hat{X}_h) - 2\hat{R}_h Cov(\hat{Y}_h, \hat{X}_h)]$$

Where,

$$Cov(\hat{Y}_h, \hat{X}_h) = (1 - f_h) \frac{n_h}{n_h - 1} \sum_{i=1}^{n_h} \left(\hat{Y}_{hi} - \frac{\hat{Y}_h}{n_h} \right) \left(\hat{X}_{hi} - \frac{\hat{X}_h}{n_h} \right) + f_h \sum_{i=1}^{n_h} (1 - f_{hi}) \left(\frac{h_{hi}}{h_{hi} - 1} \right) \sum_{j=1}^{h_{hi}} \left(\hat{Y}_{hij} - \frac{\hat{Y}_{hi}}{h_{hi}} \right) \left(\hat{X}_{hij} - \frac{\hat{X}_{hi}}{h_{hi}} \right)$$

f_h = average first stage probability of selection of EAs within stratum h .

$f_{hi} = \frac{h_{hi}}{H_{hi}}$ = average second stage probability of selection within the i^{th} sample EA in stratum h .

\hat{A}_{hi} , \hat{Y}_{hi} , \hat{X}_{hi} are weighted total of area, characteristic y and characteristic x, respectively, of the i^{th} EA and h^{th} stratum.

\hat{A}_{hij} , \hat{Y}_{hij} , \hat{X}_{hij} are weighted values of area, characteristic y and characteristic x, respectively, from j^{th} agricultural household in the i^{th} EA and h^{th} stratum.

Since all strata are independent, the total variance at regional and country level is computed by aggregating the result obtained at Zone/Special Wereda level, i.e.

$$Var(\hat{A}) = \sum_h^L Var(\hat{A}_h), Var(\hat{R}) = \sum_{i=1}^L Var(\hat{R}_h),$$

Where, L is the number of strata (Zone/Special Wereda).

In estimating the sampling variance by the above formula, selection of EAs within a stratum is assumed to be with replacement. By so doing the variance estimate may be slightly over estimated but it greatly simplifies the estimation procedure.

5. Coefficient of Variation (CV) of Estimates:

Coefficient of Variation (CV) in percentage of estimate of stratum total of area is given by:

$$CV(\hat{A}_h) = \frac{\sqrt{Var(\hat{A}_h)}}{\hat{A}_h} * 100, CV(\hat{R}_h) = \frac{\sqrt{Var(\hat{R}_h)}}{\hat{R}_h} * 100$$

6. Ninety-Five Percent Confidence Interval (CI) of Stratum Total of Area:

$$\hat{A}_h \pm 1.96 * SE(\hat{A}_h),$$

Where, $SE(\hat{A}_h) = \sqrt{Var(\hat{A}_h)}$ is standard error of the stratum total area estimate.

Estimates of standard error and confidence interval for the ratio estimate can also be calculated by adopting the above formulas.

APPENDIX IV:
Survey Questionnaire

CENTRAL STATISTICS AGENCY
ANNUAL AGRICULTURAL SAMPLE SURVEY
(2013 E.C.)

SECTION 1: Area Identification

1	2	3	4	5	6	7	8	9	10	11	12	13	14
Region	Zone	Woreda	Kebel e	EA	HH ID	Sex of HH head M = 1 F = 2	Holder ID	Holder's				Type of agriculture Crop = 1 Livestock = 2 Both = 3	
								Name	Age	Sex M = 1 F = 2	Level of education completed	House hold size Code	

SECTION 2:- Field /Other land use details

15	16	17			
		Parcel No.		Plot/field No.	
S. No.	Questions for the holder	The field is covered by: Single crop = 1 Mixed crops = 2 Other land use = 3			
		Crop/other land use name	Crop name	Crop name	
		Code	Code	Code	Code
1	Type of holding: Own = 1 Rented in = 2 Sharecrop in = 3 Other (specify) = 4				
1.1	For how Much did you rent this plot? If it is your own, how much would you pay if you rent it? (If it is share cropped in, estimate the share of the production that you will share to the owner of the plot in birr.)				
2	Is the field under extension program/ Service? Yes = 1 No = 2				
3	Was this field /plot Irrigated? Yes = 1 No = 2 → Q4				
3.1	If it was irrigated, source of water: River = 1 Lake = 2 Pond = 3 Harvested water = 4 Well/ground water = 5 Dam = 6 other (specify) = 7				
3.2	Type of irrigation: Full/conventional irrigation = 1 Supplemental irrigation = 2				
4	How many times was the field tilled in this production season? Zero tillage (direct drill/seedling) = 1 Tilled once = 2 Tilled two times = 3 Tilled three or more times = 4 Not at all(not cultivated) = 5				
4.1	Slope of the field/plot: Plain = 1 partially slopy = 2 slopy = 3				
5	Did you use prevention methods against soil erosion on this field? Yes = 1 No = 2 → Q6				
5.1	If the answer to Q5 is Yes, main soil erosion preventive method used: Terracing = 1 Bund = 2 Planting trees = 3 Plough across the contour = 4 Rotational grazing = 5 avoiding grazing = 6 Creating grassed waterways = 7 Other (specify) = 8				
6	Do you apply any method to maintain /improve soil organic matters on this field/plot? Yes = 1 No = 2 → Q7				

6.1	(If the response to Q6 is YES, what method do you mainly used?) Growing/Sowing temporary crops in rows between permanent(perennial) crops = 1 Covering the soil with leaves and crop residues= 2 Using natural(organic) fertilizer =3 Using chemical fertilizers properly(appropriate placement) =4 By avoiding loose grazing= 5 By sowing/growing different types of crops in one field= 6 intercropping the complexity crop rotations with leguminous(Pulses) crops= 7 other(specify) = 8							
7	How were seeds planted/ sowed? (For only Temporary crops) <i>Broadcasting = 1 Row planting = 2</i>							
8	If more than one crop grown or if crops were intercropped, give the percentage of land devoted to each crop (the total percentage should equal 100).							
9	Number of Plants or trees on the field (for permanent crops only). (exclude chat, pineapple and sugarcane)							
10	Number of matured plants or trees (in full production) on the field (exclude chat, pineapple and sugarcane)							
11	Of the total area of this field, what percent of it is devoted to trees in full production (for each crop type)?							
12	(For “enset” trees only) Number of trees harvested/to be harvested in the production season:							
13	Type of seed/seedling sowed/planted: Improved seed = 1 local seed = 2 → <u>Q16</u>							
13.1	If code 1 for Q13, the seed used was: (For only Temporary crops) New improved seed for this production season = 1 Improved seed left over from last year production season = 2 Improved seed saved from previous harvest = 3 (if Code 2 or 3 for Q13.1, → <u>Q16</u>)							
13.2	If code 1 for Q13.1, From whom/or institution did you obtain/purchase the seed? Code (a) : (codes are available in enumerators manual).							
14	(For Cereals, Pulses and Oil seeds only:) If improved seeds are used, (If code 1 for Q13, quantity of seed used (in Kg)	Kg	Gm	Kg	Gm	Kg	Gm	
15	(For Cereals, Pulses and Oil seeds only): If improved seeds are used, (If code 1 in Q13), Total cost of seed(Birr)	Birr	Cents	Birr	Cents	Birr	Cents	
16	(For Cereals, Pulses and Oil seeds only:) If local seeds are used, (If code 2 in Q13, Code 2 or 3 in Q13.1), quantity (in Kg)	Kg	Gm	Kg	Gm	Kg	Gm	
16.1	(For Cereals, Pulses and Oil seeds only): If local seeds are used, (If code 2 in Q13, Code 2 or 3 in Q13.1), Total cost of seed(Birr)	Birr	Cents	Birr	Cents	Birr	Cents	
17	Was there any crop damage on this field? Yes = 1 No = 2 (if the answer is no to Q17, → Q20)							
18	If there was crop damage, (if code 1 for Q17): Main cause of damage:	→						
	Code for main cause:	→						
19	Percent damaged (if code 1 for Q17):							
20	Have you applied any preventive methods against crop damage? Yes = 1 No = 2 (if the answer to Q20 is no, → Q23)							
21	Type of preventive methods (if code 1 to Q20): Chemical = 1 Natural/traditional/ = 2 Both = 3							

SECTION 2:- Field /Other land use details Cont'd

15	16	17							
22	If chemical was used, type of chemical: Pesticide = 1 Herbicide = 2 fungicides = 3 1 &2= 4 1 & 3 = 5 2 &3 = 6 All = 7								
23	Have you applied/used natural/chemical fertilizers on this field? Yes = 1 No = 2 (if the answer to Q23 is no →Q27)								
24	If fertilizer was applied, type of fertilizer: Natural = 1 Chemical = 2 Both = 3								
25	If chemical fertilizer was applied, (if code 2 or 3 to Q24): 25.1 Type of chemical fertilizer: UREA = 1 DAP =2 UREA & DAP = 3 NPS = 4 NPS & UREA = 5 Blended = 6 UREA & Blended = 7								
	25.2. Quantity of chemical fertilizer applied to the field (by fertilizer type):	DAP Kg	UREA Kg Gm	NPS Gm	Kg	Blended Kg Gm			
	25.3.If used(applied) chemical fertilizer Total Cost (by fertilizer type):	Birr	Cents	Birr	Cents	Birr	Cents	Birr	Cents
26	If natural fertilizer was used, (if code 1 or 3 to Q24), type of natural fertilizer: Animal waste/manure = 1 compost = 2 Orga = 3 1 & 2 = 4 1 & 3 = 5 2 & 3 = 6 all = 7 other(specify) = 8								
27	Number of times you harvest from this field/plot in this season?								
28	If you harvest twice or more from this plot in this production season, name of crop harvested: (more than one crop possible).	Crop name	Code	Crop name	Code	Crop name	Code		
29	What was the field before this production season? Left fallow = 1 own cropped/cultivated land = 2 government forest/ tef/swamp = 3 communal grazing/forest/tef land = 4 grazing/forest/tef land under other holder = 5 Cropped/cultivated land under other owner = 6 Own forest/grazing land /tef/swamp=7 other (specify) = 8								
30	Number of oxen/other animals used during Land Clearing,land preparation and planting								
30.1	Total Cost paid for animal services(oxens/other animals) during Land Clearing,land preparation and planting(If own animals used, Estimated Cost)								
		Male	Female	Child					
31	Number of days family members spent on this field during Land Clearing,land preparation and planting(In Person-days)								
31.1	Estimated cost for family members participated on this field during Land Clearing,land preparation and planting(In Birr)								
32	Number of days hired persons spent during Land Clearing,land preparation and planting(In Person-days)								
32.1	Total cost for hired persons during Land Clearing,land preparation and planting(In Birr)								
33	Labour sharing(Debo,Wenfel,Jigi): Number of days persons in the work party spent during Land Clearing,land preparation and planting(In Person-days)								
33.1	Total Cost paid for persons participated in the work party,(Including spent in the form of foods,drinks,...etc)(In Birr)								
34	Total cost spent for mationsry service during Land Clearing,land preparation and planting (If own mationary used, estimate in monetary value)(In Birr)								
35	Total cost spent for animal service for transport during Land Clearing,land preparation and planting .(In Birr)								

CENTRAL STATISTICAL AGENCY
ETHIOPIAN AGRICULTURAL SAMPLE SURVEY 2020/21 (2013 E.C)

PART I – IDENTIFICATION PARTICULARS

SECTION 1: Area Identification

1	2	3	4	5	6	7	8	9	10	11	12	13	14
Region	Zone	Woreda	Kebel e	EA	HH ID	Sex of HH head M = 1 F = 2	Holder ID	Holder's				Type of agriculture Crop = 1 Livestock = 2 Both = 3	
								Name	Age	Sex M = 1 F = 2	Level of education completed	House hold size Code	

PART II – MISCELLANEOUS QUESTIONS FOR THE HOLDER

15	16	17
SER.NO.	QUESTIONS	CODE
1	Do you practice crop rotation on your land holing? 1. Yes 2. No 3. they have no farmland	
2	If you have not used chemical fertilizer on any of your farm, what was the main reason? Ignorance 1 High price 2 Lack of Money 3 Lack of supply 4 lack of credit service 5 Skeptical of the outcome 6 Others (specify) 7 Used chemical fertilizers 8 Not Applicable 9	
3	If you did not obtain any extension service on any of your fileds, what was the main reason? Ignorance 1 Lack of Money 2 Skeptical of the outcome 3 Non – availability of the program 4 Lack of adequate crop fields 5 Others (specify) 6 participated in Extension Program 7 Not Applicable 8	
4	Are you a beneficiary of credit service for agricultural purpose in the survey year? 1. Yes 2. No	
4.1	If you were a beneficiary of credit service, from whom did you obtain the credit? From Government 1 From Private loan organization 2 From Non Governmental Organization(NGO) 3 From Association(Corporation) 4 Others (specify) 5	
5	If you are not beneficiary of credit what was the reason? Non availability of the service 1 Unable to pay the loan 2 Inadequate services provided 3	

	Ignorance	4	
	Does not yield any results	5	
	Others(specify)	6	
6	In the survey year, did you receive agriculture related advice? 1. Yes 2. No		
7	If you didn't receive advice, (cod 2 Q # 6) Why?		
	Non availability of the service	1	
	Inadequate services provided	2	
	Ignorance	3	
	Does not yield any results	4	
	Others(specify)	5	
8	what was your main source of purchase of chemical of fertilizers?		
	Government organizations	1	
	Private organizations	2	
	Merchants	3	
	Associations	4	
	Others (Specify)	5	
	I don't purchased chemical fertilizer	6	
9.1	Total chemical fertilizer obtained and prepared for use in any form it includes purchased, gift, loan or support by type of chemical fertilizer in kilo gr(for this meher season)		
	Quantity of total UREA obtained for the current Meher season in Kilo Gram(KG)		
	Quantity of total DAP obtained for the current Meher season in Kilo Gram(KG)		
	Quantity of total NPS obtained for the current Meher season in Kilo Gram(KG)		
	Quantity of total BLENDED obtained for the current Meher season in Kilo Gram(KG)		
9.2	The amount of chemical fertilizers used for main season by type of fertilizers in kilo gram?		
	Quantity of total UREA obtained for the current Meher season in Kilo Gram(KG)		
	Quantity of total DAP obtained for the current Meher season in Kilo Gram(KG)		
	Quantity of total NPS obtained for the current Meher season in Kilo Gram(KG)		
	Quantity of total BLENDED obtained for the current Meher season in Kilo Gram(KG)		
9.3	The amount of UREA chemical fertilizer prepared for use in 9.1 was not equal to the amount used in 9.2, What was the reason?		
	I saved the rest for other mehr season	1	
	I saved the rest for belg season	2	
	I sold the rest	3	
	I gave the rest for someone else	4	
	Other (specify)	5	
9.3	The amount of DAP chemical fertilizer prepared for use in 9.1 was not equal to the amount used in 9.2, What was the reason?		
	The amount of NPS chemical fertilizer prepared for use in 9.1 was not equal to the amount used in 9.2, What was the reason?		
	The amount of BLENDED chemical fertilizer prepared for use in 9.1 was not equal to the amount used in 9.2, What was the reason?		
10	In general how much kilo gram of pesticides, fungicides and herbicides you used for main season?		
	Quantity of pesticide used during this meher season? (KG)		
	Quantity of fungicide used during this meher season? (KG)		
	Quantity of herbicide used during this meher season? (KG)		
11	Number of own oxen actually used for plugging during the current meher season?		
12	If you do not have enough oxen how do you plough? By renting ox		1

	By pairing mine with someone's ox	2	
	By pairing mine with other animals	3	
	Using other animals (horses or cows)	4	
	Hand digging	5	
	Using borrowed oxen	6	
	By using tractor/other machine	7	
	Other (specify)	8	
13	How many farm oxen do you have currently?		
14	What type of main farming tool do you use for ploughing?		
	Traditional plough	1	
	Modern single-plough	2	
	Modern dual plough	3	
	Tractor	4	
	Hand-held motorized plough	5	
	Hand drum	6	
	Other (specify)	7	
15	What kind of crop threshing tool do you usually use to thresh a crop?		
	Hand-threshing	1	
	By animals	2	
	By modern threshing tool	3	
	Other (specify)	4	
16	Have you ploughed additional fields over that of the previous year? 1. Yes 2. No		
17	If yes in question # 16, what was the previous status of the additional field?		
	own forest/ tef/swamp	1	
	Government forest/ tef/swamp	2	
	communal grazing/forest/tef land	3	
	grazing/forest/tef land under other holder	4	
	Other (specify)	5	
18	have you been involved in local watershed development program last year? 1. Yes 2. No		
19	How many days have you been involved?		
20	Three main tasks you did during watershed development program?		
	Terracing	1	
	Planting trees	2	
	Ketere work	3	
	Constructing water reservoirs	4	
	Constricting rood	5	
	Drainage work	6	
	Planting pit work	7	
	Ternche	8	
	Gabiyon	9	
	Constructing bridge	10	
	Stone terracing	11	
	Other (specify)	12	
21	Total cost Spent for the use of irrigation in this meher season? (no cost fill 0)		
22	Total cost Spent to prevent soil erosion during this meher season? (no cost fill 0)		
23	Total cost Spent for minor repairs to agricultural equipment's during this meher season?(no cost fill 0)		
24	Total cost Spent to product container during this meher season? (no cost fill 0)		

25	Have you heard that a disease called corona virus (COVID-19) has occurred in Ethiopia? 1. Yes 2. No	
26	If YES Q25, From whom did you hear about corona virus in Ethiopia?	
	Radio 1	
	Television 2	
	From relative/neighbor/friend 3	
	Newspaper 4	
	From social media (face book, Telegram, Websites etc) 5	
	From Keble meeting 6	
	Keeping physical distance of 1m (3 feet) 7	
	Wearing recommended fabrics or medical mask 8	
	Washing hands with soap and running water regularly 9	
	Frequently cleaning hands with alcohol-based sanitizer 10	
	Traditional ways 11	
	Other 12	
27	What do you know about ways to prevent corona virus pandemic disease?	
	Keeping physical distance of 1m (3 feet) 1	
	Wearing recommended fabrics or medical mask 2	
	Washing hands with soap and running water regularly 3	
	Frequently cleaning hands with alcohol-based sanitizer 4	
	Traditional ways 5	
	Other 6	
28	What do you do most of the time to prevent corona virus pandemic disease?	
	Keeping physical distance of 1m (3 feet) 1	
	Wearing recommended fabrics or medical mask 2	
	Washing hands with soap and running water regularly 3	
	Frequently cleaning hands with alcohol-based sanitizer 4	
	Traditional ways 5	
	Other 6	
29	What was the main impact of corona virus pandemic disease on your farming activities ?	
	Farmland preparation work has been delayed 1	
	The seed season has been delayed 2	
	Delay in supply of agricultural inputs 3	
	Lack of man power required for farming 4	
	Increasing the cost of agricultural inputs 5	
	It had no effect 6	
	Other 7	
30	Because of COVID-19 negative impact, by what percentage decreased current year area covered by crop compared to the last year?	
31	Because of COVID-19 negative impact, productivity of major crops of current year compared to the last year?
